

S.No: 34	Exp. Name: <b>Write java program(s) that use collection framework classes. (LinkedList class)</b>	Date:2023-12-05
----------	---	-----------------

### Aim:

Write a java program(s) that use collection framework classes.(LinkedList class)

### Source Code:

LinkedList.java

```
import java.util.*;
import java.io.*;
public class LinkedList{
    public static void main(String args[]){
        try{
            BufferedReader br=new BufferedReader(new InputStreamReader(System.in));
            System.out.println("No.Of Strings in LinkedList:");
            int size=Integer.parseInt(br.readLine());
            LinkedList<String> stringList = new LinkedList<>();
            for(int i=1;i<=size;++i){
                System.out.println("Enter the String:");
                stringList.add(br.readLine());
            }
            System.out.println("LinkedList:"+stringList);
            System.out.println("The List is as follows:");
            for(String word:stringList)
                System.out.println(word);
        }
        catch(IOException e){
            e.printStackTrace();
        }
    }
}
```

### Execution Results - All test cases have succeeded!

Test Case - 1
User Output
No.Of Strings in LinkedList: 3
Enter the String: Hi
Enter the String: Hello
Enter the String: World
LinkedList:[Hi, Hello, World]
The List is as follows:
Hi
Hello
World

Test Case - 2
User Output
No.Of Strings in LinkedList: 2

Enter the String: Human
Enter the String: Being
LinkedList:[Human, Being]
The List is as follows:
Human
Being
